Professional Summary

Detail-oriented QA Automation Engineer with 3+ years of experience in manual and automated testing of web applications. Expertise in building and maintaining automation frameworks using Selenium WebDriver with Java and TestNG. Experienced in functional, regression, API, and cross-browser testing in Agile environments. Skilled in developing automation strategies, executing regression test suites, and performing continuous testing across the application lifecycle. Proficient in defect tracking using JIRA, collaborating with cross-functional teams, and improving test coverage through scalable automation solutions to ensure high-quality software delivery.

Technical Skills

- **Database:** MySQL, MS SQL Server (Basic queries)
- **Automation Testing Tools:** Selenium WebDriver, TestNG.
- **Programming Language:** Java.
- **Frameworks:** Data-Driven Testing, Page Object Model (POM), Hybrid Frameworks
- **Build & Dependency Tools:** Maven
- **Version Control:** Git
- **Testing Types:** Functional, Regression, Smoke, Cross-Browser
- **Defect Tracking & Collaboration:** Jira
- **Test Reporting:** Extent Reports, TestNG Reports
- **Agile Practices:** Sprint Planning, Daily Stand-ups, Retrospectives
- **Other Skills:** Test Strategy, Test Case Design, Requirement Analysis

WORK EXPERIENCE

Quality Analyst

Quaere ETechnologies Pvt. Ltd., Lucknow | June 2023 – Present

- Designed and developed automation test scripts using Selenium WebDriver with Java for web applications.
- Created and maintained scalable automation frameworks using TestNG integrated with Maven.
- Executed functional, regression, and cross-browser testing to ensure application stability.
- Implemented Page Object Model (POM) and Data-Driven Testing to enhance test maintainability and reusability.
- Worked with Selenium Grid for parallel execution across multiple browsers.
- Conducted defect tracking and reporting using Jira, ensuring quick issue resolution.
- Collaborated with developers, product owners, and business analysts to identify and resolve defects.

Key Achievements:

- Improved test execution efficiency by 30% through optimized Selenium test suites.

Technical Support Executive

Iterate India Pvt. Ltd., Noida | December 2021 – April 2023

- Prepared test scenarios, test cases, and test data based on project requirements.
- Performed Manual Testing including Functional Testing, Integration Testing, System Testing, and Regression Testing.
- Delivered client support and replicated production issues for QA validation.
- Conducted Smoke Testing and Sanity Testing after new builds were deployed.
- Logged defects in JIRA and collaborated with developers to resolve issues.
- Involved in Test Case Review and Requirement Traceability Matrix (RTM) preparation.

Key Contribution:

- Facilitated quality validation independently while managing support tasks, aligning QA and support efforts.

Projects

1. UPSOSB Education Management System

Project Description

UPSOSB is a **web-based education management system** used for managing student registrations, exam processes, results, and academic administration for educational institutions. The application allows administrators, teachers, and students to access and manage academic data efficiently.

Technologies Used

Selenium WebDriver, Java, TestNG, SQL, Maven, JIRA

Responsibilities

- Analysed functional requirements and SRS documents to understand system functionality.
- Designed and executed test cases for student registration, exam management, and result modules.
- Automated regression test cases using Selenium WebDriver with Java.
- Implemented Page Object Model (POM) to maintain reusable automation scripts.
- Executed cross-browser testing on Chrome, Firefox, and Edge.
- Logged defects in JIRA and collaborated with developers to resolve issues.

2. HRMS – Human Resource Management System

Project Description

HRMS is a **web-based application used by organizations to manage employee information, attendance, payroll, leave management, and recruitment processes**. The system allows HR teams to maintain employee records, track attendance, manage leave requests, and generate payroll reports efficiently.

Technologies Used

Selenium WebDriver, Java, TestNG, Maven

Responsibilities

- Analysed business requirements, user stories, and SRS documents to understand application functionality.
- Designed and executed test cases for employee management, leave requests, and payroll modules.
- Performed functional testing, regression testing, and UI testing to validate application features.
- Used Selenium Grid for parallel test execution to reduce automation execution time.
- Logged and tracked defects using JIRA and worked closely with developers to resolve issues.
- Participated in Agile Scrum meetings including sprint planning, daily stand-ups, and retrospectives.

Education

Master of Computer Applications (MCA)

Chandigarh University | 2025 – **Present**

Bachelor of Computer Applications (BCA)

Lucknow Public College of Professional Studies | 2018 – 2021

Certifications

- Selenium with Java + Cucumber + TestNG – **Udemy**
- Manual, Web, and Mobile App Testing – **Udemy**
- Software Testing Certificate – **Stad Solution**
- Generative AI Foundations Certificate – **upGrad (in collaboration with Microsoft)**
